EDUCATION

Rajarshi Rananjay Sinh Institute of Management and Technology, Amethi UP 7.6/10
Bachelor of Technology in Computer Science *Aug 2017–Aug 2021*

Einstein Public School, Pratapgarh UP 81%
Intermediate in Science *Apr 2016*

TECHNICAL SKILLS

Frontend: JavaScript, HTML/CSS, ReactJs, TypeScript, Material UI, Bootstrap, Tailwind
Backend: Nodejs, Express, Rest Api, Sql, NoSql, MongoDB, Authentication, Validation
Developer Tools: Git, VS Code, Postman
Soft Skills: Professional Communication, Team Collaboration, Microsoft Excel, Agile

EXPERIENCE

Frontend Developer Oct 2021 – Present
Tata Consultancy Services *Gurugram, India*

- Built and maintained responsive web applications using Redux, React Router, hooks, context API and performance optimizations (lazy loading, memoization) for seamless navigation.
- Developed sleek user interfaces with Tailwind, Bootstrap, and Sass, ensuring responsive and consistent designs across various devices.
- Collaborated with backend teams, creating RESTful APIs to enhance data interaction and streamline front-end and back-end integration.
- Ensured code reusability and scalability, following best practices that reduced bugs and improved deployment times.
- Worked in an Agile environment, actively participating in sprint planning, code reviews, and team collaboration to ensure timely and efficient project delivery.

CERTIFICATIONS

Build Modern Web App May 2022
Tata Consultancy Services
  ∗ Completed course on MERN stack and qualified exam with distinction conducted by TCS internally

Skillthon'18 AI workshop Oct 2018
Skill It Nation
  ∗ completed workshop held at college campus and won certificate of merit

PROJECTS

Memories Web App | *Javascript, ReactJs, Material UI, GAuth, NodeJs, Express, MongoDB, Git*
  ∗ Developed a full-stack web application using with MERN stack, a REST API with React as the frontend
  ∗ Implemented Google OAuth to get user login and new user data
  ∗ Used to git to track project and update modifications
  ∗ Used MongoDB api to connect to cloud database

Sudoko Game | *Javascript, ReactJs, NodeJs, MongoDB, Git*
  ∗ Implemented algorithm to solve sudoko and generate a sudoku problem
  ∗ Implemented algorithm into web app built using MERN stack
  ∗ Implemented time tracking and scores to compete modules

Contacts and Messaging | *Javascript, ReactJs, Material UI, Twilio Api, NodeJs, Express, MongoDB, Git*
  ∗ Developed a full-stack web application using with MERN stack, a REST API with React as the frontend
  ∗ Implemented Twilio api to send messages to saved contacts
  ∗ Used to git to track project and update modifications
  ∗ Used MongoDB api to connect to cloud database
